Highly skilled and motivated Data Engineer with 6.5+ years of experience across various industry segments. Seeking a challenging position in a dynamic organization to leverage expertise in data modeling, ETL development, data warehousing, and a strong passion for data engineering. Proven ability to create robust and scalable data pipelines, optimize data management processes, enhance data quality, and drive innovation.

CORE COMPETENCIES

- **Programming Languages**: Python, SQL, Java, UNIX
- **Big Data Tools**: Azure Databricks, PySpark, Spark Architecture, MS SQL Server, AWS Glue, S3, Redshift, BigQuery
- **Workflow Schedulers**: Apache Oozie, Autosys, Azure Data Factory Orchestration
- **ETL Tools**: Azure Data Factory, Databricks, Azure Data Lake, ADLS, Synapse Analytics, MS SQL Server studio
- **DevOps Tools:** GitHub, SourceTree, Confluence, Jira, Visual Studio
- **Data Visualization**: Power BI, Tableau, Matplotlib, seaborn
- **Machine Learning**: Scikit, Multiclass Classification, Regression Models, Deep Neural Network

EDUCATION

Master Of Engineering, ON, Canada **Sep 2019 – Dec 2020**
University of Guelph

WORK EXPERIENCE

Sr. Data Engineer, Auria Solutions **Jan 2025 – Present**

- Designed and managed **data pipelines in Azure Data Factory** to integrate data from multiple ERP systems into a centralized lakehouse .Implementing monitoring and alerting services for pipeline health and reliability.
- Designed and developed **data transformations in Microsoft Fabric** using the **medallion architecture (bronze, silver, gold layers)**, standardizing and cleansing **5TB+ of monthly data** to ensure high-quality, analytics-ready datasets.
- Built **fact and dimension tables in the gold layer** to power enterprise **Power BI dashboards**, improving reporting efficiency by **35%** and enabling faster, data-driven decision-making for business stakeholders

Big Data Engineer *TD Bank (L&H Insurance)* **Jan 2021- Dec 2024**

- Streamlined end-to-end data integration for MDM system by designing and implementing scalable pipelines to process data from 20+ sources into Informatica MDM (C360), reducing latency by 30% and improving data accuracy by 25%.
- Migrated on-premises data warehouses to Azure, designing and deploying efficient pipelines in ADF that resolved ingestion discrepancies in 60% of Malcodes, improving data reliability and reducing downtime.
- Led the Enterprise Data Foundation (EDF) project by implementing the Data Vault model (hub, link, satellite tables), improving data integrity and reducing retrieval time by 40%.
- Automated data validation in Databricks using Python, cutting validation time by 30% and improving data quality for faster deployment.
- Designed and managed workflows in ADF and Oozie with integrated monitoring/logging (Azure + Datadog), ensuring 99% uptime and rapid issue resolution.
- Optimized SQL queries with indexing and restructured joins, reducing execution time from 10s to <3s and accelerating analytics for stakeholders.

Data Engineer, *Reliance Industries Ltd. India* **Jul 2017 – July 2019**

- Created **Pivot** tables**, V-LookUps,** Charts and **identified** missing data using **Excel.**
- Achieved 20% inventory cost reduction through strategic utilization of SQL, Python, and data analytics for optimized inventory management
- Automated ERP data migration using Python and SQL, while creating **PowerBI** dashboards for internal purposes, resulting in streamlined.
